

Corrosion Protection Coatings

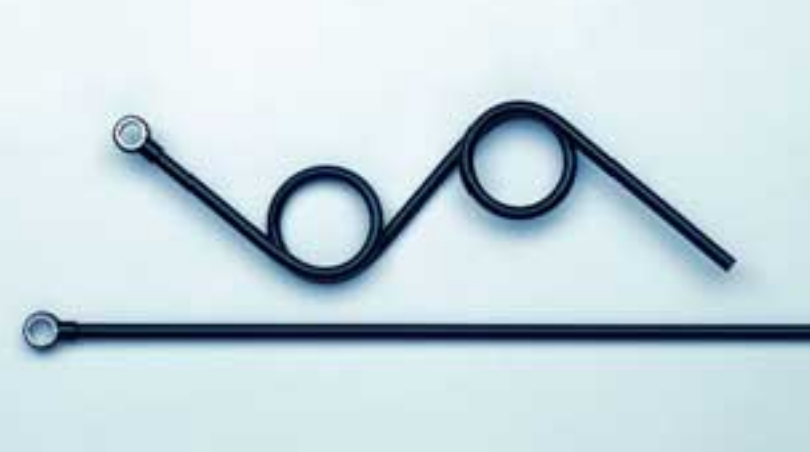

► Job Coater for DUPLEX Coatings out of zinc plating and organic coatings. ► Coating of parts in DELTA-PROTEKT®, DELTA-TONE® and other specialized products. ► Meeting the specifications of the automotive industry.

► DUPLEX Coatings are applied when zinc plating, for corrosion protection, is not sufficient, when an additional electric isolator or a special visual aspect is required. Additionally, parts coated with an under layer of zinc phosphate, zinc plating or DELTA-TONE® are protected against corrosion in case the topcoat is damaged.

► Our Corrosion Protection Coating System allows deformations after the application of the coating. Tubes or connectors can be bent, pressed or formed without damaging the topcoat.

► The combination of zinc plating + zinc-phosphate + DELTACOLL® meets the highest corrosion protection standards and has an additional visual aspect, so called "Titanium Look".

► Furthermore, we develop various combinations of finishes and coatings, free of Cr(VI), to meet the European End-of-Life-Vehicle Directive (ELV).

Products

Inorganic Coatings

- Zinc plating with trivalent chromate - Rack installation (2800 x 880 x 300 mm)
- Zinc phosphate - Rack installation (2800 x 880 x 300 mm)
- Zinc-nickel alloy plating - Rack installation (2800 x 880 x 300 mm)
- DELTA-PROTEKT® (zinc-aluminum flake coating) - Rack installation (3000 x 1500 x 300 mm)
- DELTACOLL® (siliceous based coating) - Rack installation (3000 x 1500 x 300 mm)

Organic Coatings

- DELTA-SEAL® - Rack installation (3000 x 1500 x 300 mm)
- DELTA-FLEX® - Rack installation (3000 x 1500 x 300 mm)
- Fluor based coatings - Rack installation (3000 x 1500 x 300 mm)
- Polyester and epoxy powder coatings - Rack installation (3000 x 1500 x 300 mm)
